

# PORTABLE INTRUSION DETECTION SYSTEM (PIDS)

RAPID DEPLOYABLE

## Product Overview:

PSG's Portable Intrusion Detection System (PIDS) is designed for fast deployment and expansion, providing a versatile and reliable security solution. Whether protecting critical infrastructure, supporting temporary secure areas, or responding to emergencies, PIDS delivers exceptional performance with minimal setup time.

Equipped with PSG's physical security and video management solutions integrated with perimeter intrusion detection sensor technologies, CCTV cameras for assessment, wireless communications, and onboard power, PSG's PIDS provides a fixed site perimeter security solution in a mobile platform.

# PORTABLE INTRUSION DETECTION SYSTEM (PIDS)

## RAPID DEPLOYABLE

---

### Standard PIDS Configuration:

- Standalone Headend System (Intrusion Detection, Video Management)
- One to Eight Four-Sector Field Systems
- 4 Sectors per field system, each with 2 discrete perimeter sensors and immediate video assessment
- Expandable: Add up to 4 additional sensors per sector (Gap Filler, ECP, etc.)
- Detection Range: 400m to 2400m (terrain and deployment dependent)
- High Security Compliance: A compensatory measure for High Security Controlled Areas

### Key Features:

- Versatile Applications: Ideal for site security, temporary facilities, security refresh, maintenance, testing, and emergency response.
- Construction-Ready: Perfect for high-security perimeter installations, maintenance, failure scenarios, or temporary security perimeters.
- Rapid Setup: Deployable within 8 hours by a team of three in a greenfield environment.
- Expandable & Customizable: Preassembled, preconfigured, with easy quick-connect cabling for additional security elements.
- Independent Operation: Equipped with a generator, battery bank, and radio; can connect to shore power and fiber for long-term use.
- Integrated Platform: Supports portable sensing, assessment, and communication capabilities.

### Summary

Tested to rigorous DOD and DOE nuclear security standards, PIDS combines the robustness of fixed-site solutions with the flexibility of rapid deployment. Managed by our LINX Predator Elite and VICADS V100 systems, PIDS is built for demanding conditions, offering a scalable, easy-to-set-up security solution for both short-term and long-term needs.
