## **PSG Selected for Oasis+ Total Small Business Award**

Austin, Texas – January 10, 2025 – Prometheus Security Group Global (PSG) announces its selection as an awardee for the General Services Administration (GSA) One Acquisition Solution for Integrated Services Plus (OASIS+) Small Business Set-Aside contract in the Facilities Domain. This contract award recognizes PSG's leadership in the security industry and support of the Presidents Executive Order (EO – 14028) mandating Zero Trust Architecture (ZTA) for federal agencies.

*"Our selection is a testament to PSG's unwavering dedication to security innovation and excellence," said Rick Gross, Co-Founder and CEO of PSG. "We are honored to play a crucial role in securing the nation's critical assets."*

By joining this exclusive group of awardees, PSG is authorized to provide security services through one of the federal government's most comprehensive contracting vehicles. This strengthens PSG's role as a trusted partner for federal agencies, offering innovative services tailored to meet the highest security standards. To learn more about incorporating Cyber and Zero Trust into physical security explore PSG's capabilities - [view our whitepapers here](#).

**About Prometheus Security Group Global (PSG):** Prometheus Security Group Global (PSG) is an industry leader in next-generation security technologies and the creator of the industry's first **Zero Trust Engine**. PSG's Zero Trust Architecture (ZTA) secures the entire environment—starting from the physical space *"in the room"* to edge sensors, including intrusion detection sensors, access readers, and cameras, extending to a cyber-secure data lake and ultimately to command and control (C2) systems.

PSG enables artificial intelligence, machine learning (AI/ML), and modeling simulations of continuously authenticated and verified data—enhancing response team safety and mission success across government agencies, critical infrastructure protection (CIP), operational technologies (OT), and process and industrial control solutions markets.

With \$120 million in intellectual property developed specifically for the federal and critical infrastructure markets, PSG's solutions seamlessly integrate with OEM platforms and third-party products, reinforcing its ability to cost-effectively and rapidly deploy advanced, innovative solutions. PSG and its team are recognized subject-matter experts with a history of industry firsts, multiple patents, and certifications, including PL1N, ATO, and RMF accreditations. PSG is GSA-approved, TAA-compliant, and adheres to NDAA, NIST-FIPS PKI, PACS, and FICAM standards. PSG is leading the way in Zero Trust, further solidifying its reputation as the trusted leader in securing critical assets and the nation's power grid.
