

IDS, AC & Video Enclosures

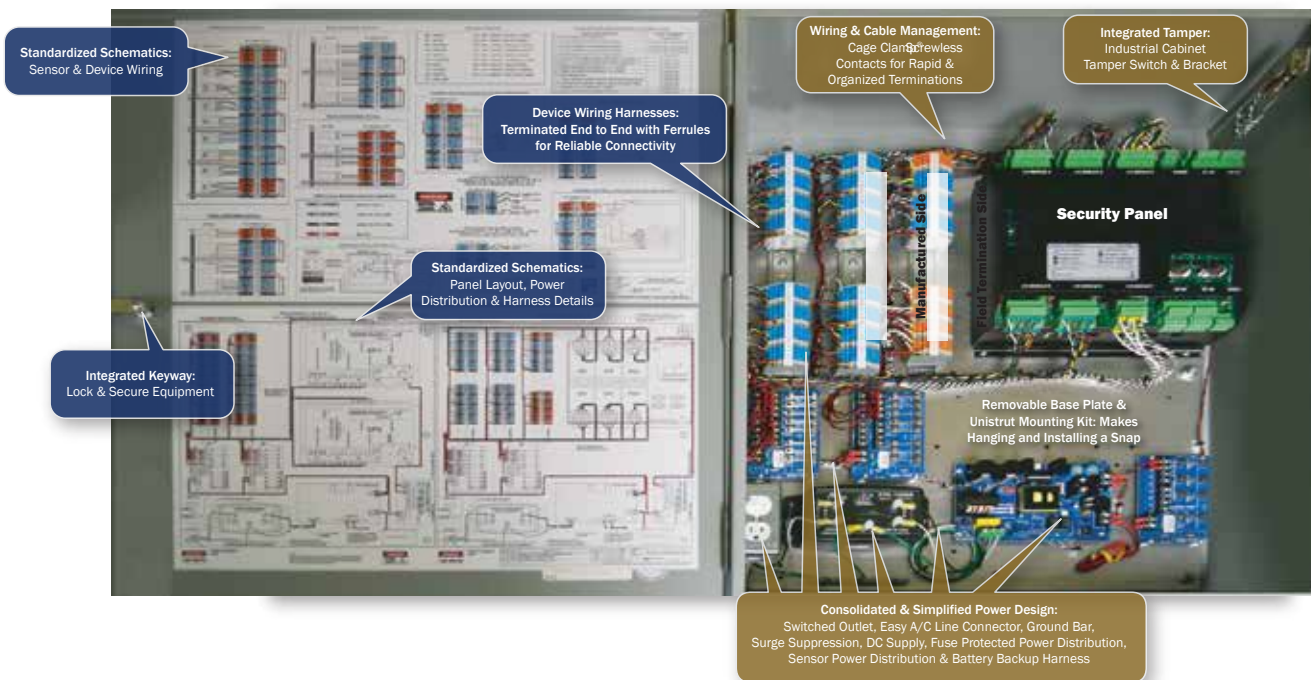

Intrusion Detection System (IDS), Access Control (AC), and Video

VICADS
VIDEO MANAGEMENT SYSTEM

OVERVIEW

With ease of installation in mind, the Prometheus Security Group (PSG) family of electrical enclosures is an installer's dream. PSG can customize any field panel and provide custom design and build. This design provides reliable, repeatable results reducing on-site installation labor hours and a proven reduction in field errors. Ranging from small to large form factors and using only UL listed components, the PSG product is designed for maintainability and manufactured in the USA.

If you have a custom need, PSG's staff of knowledgeable engineers can assist in designing an enclosure to fit your specific application. Visit our website or contact our sales team directly.

FEATURES	BENEFITS
Pre-assembled removable base plate	Installation is fast and repeatable
Internal documentation on enclosure	Equipment, wiring harnesses, internal connections & typical wiring schematics
Simplified & integrated power design	Easy connection for commercial power, ability to cut power for maintenance
Terminal block assembly cage clamp	Organizes wiring into repeatable patterns easing termination & troubleshooting
Built-in cable management	Delivers rapid, reliable & organized terminations of wires available in one location
Integrated keyways & tamper switches	Protects sensitive equipment from prying and tampering
