

Cyber Security Solution

VICADS
VIDEO MANAGEMENT SYSTEM

OVERVIEW

Cyber Security is a rapidly evolving threat and versatility is key to addressing this growing concern. Our Centralized Cyber Security Solution (CSS) provides a hosting platform for IT deployments designed for an integrated suite of tools managing cyber compliance in the local environment.

Information Security is a dynamic process and requires a thorough approach to the continuous monitoring and management of evolving threats and vulnerabilities. A holistic and agile approach allows organizations to effectively maintain the confidentiality, integrity, and availability of mission critical information. The system is designed for high-reliability and minimal downtime applications. Options include full redundancy and regionalized hardware configurations for mission critical applications.

FEATURES	BENEFITS
Inventory management	Component level management of System components for tracking and accountability
Domain controller	Domain level environment enforcement of IA policy, authentication, and authorization
Log compliance	Logging of critical system components
Accountability and non-repudiation	System events and config management
Policy provisioning, auditing, scanning	Cyber controls and auditing tools for both windows and Linux
Network management & monitoring	Network health and config management availability
Cybersecurity Aware Platform	DoD Risk Management Framework (RMF) Compliant
Big Data Analytics Integration	Fully integrated Information System intelligence correlating behavior irregularities
Configurable Slots	Allows unlimited number possible applications and integrations: Building Automation Systems, IoT devices, SCADA Systems, Power Control Systems
